ANN YAK SIONG HARDWARE SDN BHD

ANN YAK SIONG HARDWARE SDN BHD (AYSH) founded in 1982 with 30 years of experience in the business, is well known in the marketplace as one of the leading steel traders, stockists and distributors in the region and country.

With well-equipped warehouses, AYSH trades in large variety of flat and long steel products of various grades and dimensions such as beams and columns, steel plates and sheets, structural welded hollow sections, bars and rods, channels, angels, flat bars, sheet piles, pipes and tubes, wires and wire mesh etc, to serve a wide range of industries including construction, infrastructures, engineering, manufacturing, automotive, marine, oil and gas, etc.

With our experience and dedicated team that serve our valued customers, AYSH has contributed to the success of many major projects in the country and region.

AYS METAL PRODUCTS & ENGINEERING SDN BHD

AYS METAL PRODUCTS & ENGINEERING SDN BHD (AYSMPE) is involved in the manufacturing and trading of Pressed Steel tank, components and panels of Fiberglass Reinforced Polyester (FRP) sectional storage tanks for cold water storage purpose. AYSMPE exports a substantial volume of the products to countries in the Middle East, ASEAN and Africa.

CH YODOFORM SDN BHD

CH YODOFORM SDN BHD (CHY) is involved in the manufacturing and trading of high tensile galvanized steel (HTGI) purlins. The YODOFORM 'Z' and 'C' sections are precisely cold formed, cut-to length with pre-punched holes. The advantages of YODOFORM purlins are that it is lightweight, has corrosion protective surface and ready for immediate erection upon delivery to site. The products are in compliance with major International Standard and CHY is the leader in this niche market.

AYS WIRE PRODUCTS SDN BHD

AYS WIRE PRODUCTS SDN BHD (AYSWP) is a manufacturer of steel fabric (wire mesh) which is widely accepted by designers and builders as a form of reinforcement in the concrete flooring application. The fabric is produced using automatic welding machines through an electrical process which employs the fusion principle combined with a homogeneous section without losing strength or area. Standard sheets are readily available and are held in stock. The standard metric size fabrics are available in sheet of 2.2m width x 6m length.

AYSWP provides value added services such as drawing, straightening and cut-to-length, producing a wide range of mild steel round bars. These wire products are widely used as components of reinforced concrete structure and piles, and also further downstream in the manufacturing of bolt and nuts, cables, chain-link fencing and others.

AYSWP also manufactures Black Annealed Wire from carbon steel wire, run through multiple drawing and thermal annealing. The finished products are used for weaving and baling in general.
